Refrigerator

USER'S MANUAL

PSR1061BW

Dear customer:

Thank you for buying this refrigerator. To ensure that you get the best results from your new refrigerator, please take time to read through the simple instructions in this booklet。

Please ensure that the packing material is disposed of in accordance with the current environmental requirements。

When disposing of any refrigerator equipment please contact your local waste disposal department for advice on safe disposal。
This appliance must be only used for its intended purpose。

CAUTION :

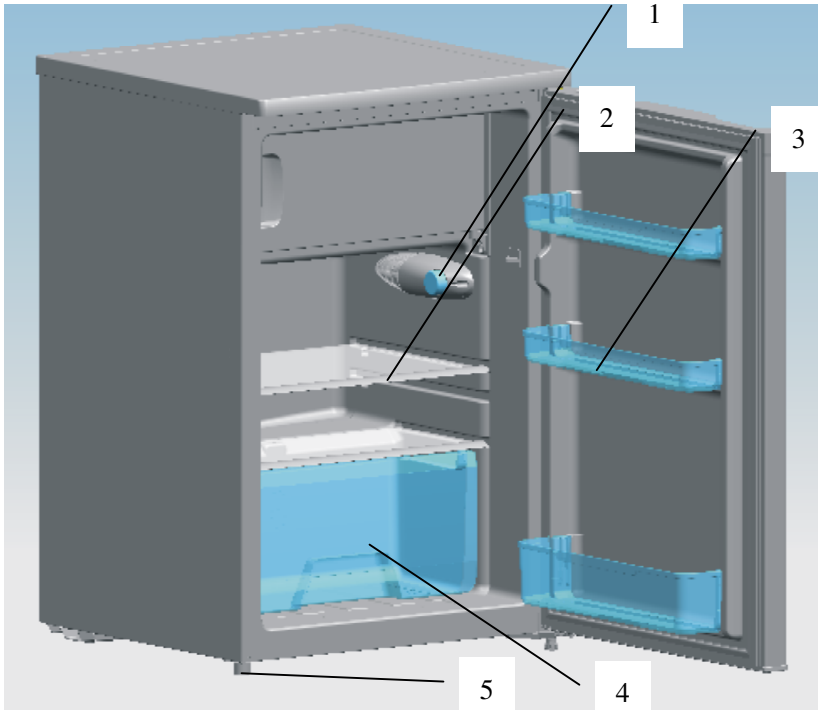
The appliance is not intended for use by young children or infirm persons without supervision。
Young children should be supervised to ensure that they do not play with the appliance。

General

This type of refrigerator is widely used in places such as hotels ,offices, student dormitories and houses. It is mostly suitable for preserving foods such as fruits and beverage. It enjoys the advantages of small size, lightweight, low electric consumption and easy use。

Chief Technical Data

Item \ Model	PSR1061BW
Type of Preventing From Electric Shock	I
Refrigerant (g)	R600a,20g
Total Storage Volume(L)	113
Rated Voltage(V)	220-240~
Rated Frequency(Hz)	50
Energy(kWh/24h)	0.47
Weight (kg)	31



Main configuration：

1、Thermostat

2、Glass shelf

3、Plastic pallet

4、Crisper

5、Leveler leg

UNPACKING YOUR REFRIGERATOR

WARNING: Use two or more people to move refrigerator.

Failure to do so can result in back or other injury.

- Remove tape and any labels from your refrigerator before using(except the rating label).
- To remove any remaining tape or glue, rub the area briskly with your thumb.
- Tape or glue residue can also be easily removed by rubbing a small amount of liquid dish soap over the adhesive with your fingers. Wipe with warm water and dry.
- Do not use sharp instruments, rubbing alcohol, flammable fluids, or abrasive cleaners to remove tape or glue. These products can damage the surface of your refrigerator.
- When moving the refrigerator, do not tilt the refrigerator beyond 45°from upright position.

CLEANING BEFORE USE：

After you remove all of the packaging materials, （especially the foam between outside condenser and cabinet should be removed）clean the inside of your refrigerator before using it.

SPACE REQUIREMENTS

WARNING: Keep flammable materials and vapors, such as gasoline, away form refrigerator.

Failure to do so can result in death, explosion, fine or burns.

- To ensure proper ventilation for your refrigerator, allow for 200mm space on each side between walls, 200mm space between back of your refrigerator and the wall, and 300mm

space between counter top and the roof or ceiling.

- If you are installing your refrigerator next to a fixed wall, leave sufficient space on the hinge side to allow for the door to swing open.
- Never install your refrigerator near heat source and direct sun shins.

ELECTRICAL REQUIREMENT

WARNING: DO NOT REMOVE GROUND PRONG.
DO NOT USE AN ADAPTOR.
DO NOT USE EXTENSION CORD.

Failure to follow these instructions can result in death, fire or electrical shock.

Before you move your refrigerator into its final location, it is important to make sure you have the proper electrical connection.

Recommended Earthing Method

A 220～240 Volt /50 Hz AC only 10 ampere fused and properly earthed electrical supply is required. It is recommended that a separate circuit serving only this appliance be provided. Use a receptacle which cannot be turned off with a switch or pull chain. Do not use an extension cord.

NOTE: Before performing any type of installation, disconnect the refrigerator from the electrical source. When you are finished, connect the refrigerator to the electrical source and reset the control to the desired setting.

LEVELING

If the refrigerator is not leveled during installation. The doors may not close or seal properly, causing cooling, frost, or moisture problems. It is very important of the refrigerator to be level in order to function properly.

To level your refrigerator you may either turn the level leg clockwise to raise that side to the refrigerator or turn counter – clockwise to lower that side.

NOTE: Having someone push against the top of the refrigerator take some weight off the leveling leg. This makes it easier to adjust the leveling leg.

USE OF THE APPLIANCE

To obtain the best possible results form your refrigerator, it is important that you operate it properly.

Temperature Control

Controls for the refrigerator and freezer are located at the fop shelf of the refrigerating compartment. **When you first install your refrigerator, set the Thermostat knob at 3.** Give your refrigerator time to cool down completely before adding food. It is best to wait 24 hours before adding food.

The thermostat knob controls the temperature. The higher number setting, the longer the compressor will run to keep the temperature colder.

When the thermostat control knob is set to **OFF,** the refrigerator is not running,

Fresh Food Storage

Wrap or store food in the refrigerator in airtight and moisture – proof material. This prevents food odor and taste transfer throughout refrigerator.

• Fruit –	wash, let dry and store in refrigerator in plastic bags or crisper.
• Leafy vegetables-	Remove wrapping and trim or tear off bruised and discolored areas, wash in cold water and drain. Place in plastic bag or plastic container and store in crisper.
• Fish –	Use fresh fish the same day as purchased.
• Meat –	Store most meat in original wrapping as long as it is airtight and moisture – proof. Re – wrap if necessary.
• Leftovers –	Cover leftovers with plastic wrap or aluminum foil. Plastic containers with tight lied can also be used.

Frozen Food Storage

The freezer compartment is designed for storing frozen food and for freezing food at home.

Successful freezing depends on the correct packaging. When you close and seal the package you must not allow air or moisture in or out. If you do, you could have food odor and taste transfer throughout the refrigerator, and also dry out frozen food.

Note: Never put bottled food or drinks in the freezer compartment.

For best performance, leave enough space in the freezer and refrigerator compartment for air to circulate around the packages. Also let enough room at the front so the door can close tightly.

Defrosting

Refrigerator compartment – Defrosting process is automatic by thermostat knob Melted frost flow into drip tray and automatic evaporating.

Freezer compartment – Defrosting for the freezer compartment is by manual process.

- Turn the thermostat knob to set at **OFF** position and leave open the freezer door.
- Remove all foods, ice cube tray and shelf or transfer to refrigerating compartment.

- Clean and wipe out the melted frost with a cloth.
- After defrosting, turn thermostat knob to origin position.

Note: To avoid damaging the freezing compartment wall, do not use any sharp objects to remove the frost or separate the frozen food.

Cleaning your refrigerator

Before you start to clean your refrigerator remove the mains plug from the power supply.
Use a clean sponge or soft and a mild detergent in warm water.
Do not use abrasive or harsh cleaners.
Hand wash, rinse and dry all surfaces thoroughly.
Do not use cleaning waxes, concentrated detergents, bleaches or cleaners containing petroleum on plastics and rubber parts.
Never use paper towels, window sprays, scouring cleansers or flammable fluids on plastic parts as these can scratch or damage material.
Clean with a cloth soaked in this solution and then dry with a soft cloth.

PROLONGED OFF PERIODS

If the refrigerator is not in use for a long period of time, proceed as follows:
Disconnect the refrigerator from the main supply by removing the plug from the wall socket.
Clean and dry the inside as instructed under the heading of cleaning the refrigerator.

Leave the door open to prevent any unpleasant smells from building up while the refrigerator is not in use.
